WELCOME

TO YEAR 9 STUDENTS AND THEIR PARENTS

This booklet outlines the Curriculum courses available to students entering Year 9. The aim of the program that you select is to give you a wide range of opportunities in the future with subjects that fit your needs and/or interests and in which you will ultimately specialise.

Secondary education covers Year 7 (aged 11/12) to Year 12 (aged 17/18). That period is broken into the Middle School Years (8 and 9) and the Senior School Years (10, 11 and 12). It is a legal requirement that students must attend school until the end of the year in which they turn 17.

The middle school curriculum at Melville Senior High School follows the Australian Curriculum and Western Australia's Curriculum Framework. **Please be aware that although course costs are listed, these charges may vary in due to unforeseen changes in curriculum delivery.**

All students in Year 9 study a set number of hours in each Learning Area. Each student will experience compulsory and elective courses across the learning areas, while some students will also study specialist courses.

COMPULSORY COURSES

- English
- Maths
- Science
- Humanities and Social Sciences
- Health and Physical Education

ELECTIVE COURSES

- *The Arts*: Made up of Visual and Performing arts for example dance, drama, digital photography, ceramics and sculpture
- *Technologies*: Made up of Design and Technology, Food Science Technology and Digital Technology, for example woodwork, metal work, cooking and creative computing.
- *Languages*: Made up of Italian or Chinese

Studied for 1-2 hours per week per choice- students typically choose 3 per semester

SPECIALIST COURSES

The areas in which a student can specialise in after being accepted are

- Gifted and Talented program (G&T) - Centrally selected
- Academic Extension Course - AEC (Humanities and/or Sciences)
- Netball (Health & Physical Education)
- Aviation
- Graphic Design Media
- Music in Focus program

These programs are described in more detail elsewhere in this handbook.

Their specialisation is recognised by a student studying the subject throughout the year. Selection into specialist programs is based on testing and/or interviews, conducted during the first half of a calendar year. Placement in a specialist program is for a 4 year duration i.e. Years 7, 8, 9 & 10, subject to suitable levels of performance.

GIFTED AND TALENTED

SELECTIVE ACADEMIC PROGRAM

Your child can discover a world of opportunities in Gifted and Talented programs. A key feature of these programs is the extension, cross curricular, co-curricular and extracurricular activities where children can be involved in international, national and state competitions, leadership programs, community service, university extension programs and study tours.

At Melville Senior High School we are aiming to provide students with a comprehensive program that will engage and challenge. Students gain entry into Humanities, English, Maths and Sciences through a state wide testing program. Students will receive academic rigour through extended learning and enrichment opportunities in Maths, Science and the Humanities learning areas. The teachers working with students in this program have completed additional professional learning that will assist them to develop each child's potential. All Gifted and Talented teachers have completed specialist GERRIC training. Our experienced team of staff will help to support students and give them the best opportunities in their academic learning programs as well as supporting their social, emotional development as young adolescents.

The program aims to encourage students to excel in their area of talent and to stimulate students' inquiry, analytical, critical, creative thinking skills. Classroom teachers aim to provide a motivating environment, to give students the skills and the time to explore an issue, text or problem in more depth and communicate their conclusions more effectively. Students are encouraged to gradually take responsibility for their own learning.

Students apply and are selected for Gifted and Talented programs through a central selection process. 'Top-up' testing for this program is available in Years 8, 9 and 10.

ACADEMIC EXTENSION COURSE

The Melville SHS AEC program provides students with a differentiated curriculum where students' needs are catered for by acknowledging various learning styles and rates of learning. Students are involved in developing higher order thinking strategies, problem solving skills, creative and divergent thinking and are encouraged to take more responsibility for their own learning. Competitions, workshops, excursions and rich tasks based on a thematic approach are also undertaken throughout the year

HOW IS THE COURSE STRUCTURED?

The Academic Extension Course is designed so that students are given every opportunity to optimise their areas of talent, therefore we have divided the program into two areas:

1. Humanities (English & Humanities & Social Sciences)
2. Sciences (Maths & Science)

Some students demonstrate exceptional ability in all four subjects and will be placed in the Humanities and Maths/Science areas, whilst other students may be talented in one area i.e. Humanities and will be in this component of the course.

HOW ARE STUDENTS IDENTIFIED?

As outlined in the Department of Education's Policy for Identification of Students who are Gifted a range of strategies are used to identify students, including:

- Completion of a maths & creativity test
- Past school grades, portfolios and NAPLAN test results
- Aptitude test
- Ongoing inclusion in AEC requires high academic achievement

The aim of the identification program is to include rather than exclude. Students are selected through a school run process. Once in the school, Year 7, 8, 9 and 10 students are mainly nominated by their teachers to enter the program.

STUDENT COMMITMENT

It is expected that students have a strong level of commitment to the program in terms of participation, attitude and achievement.

AVIATION

APPROVED SPECIALIST PROGRAM

SEMESTER 1

AVIATION 3 - 8AV91

Cost: \$79.00

BUILT TO FLY

This topic involves building of balsa gliders and a scaled down wood propeller. It builds construction skills and the use of tools to create their models. Educational objectives covered:

- Interpret and understand diagrams
- Make a propeller
- Make a model glider
- Testing and adjustment scheme

POWER TO FLY

This topic studies the components, method of operation and associated systems of piston engines and reaction engines used to power aircraft. Educational objectives covered;

- Piston engines
- Propellers
- Reaction engines
- Unconventional engines

SEMESTER 2

AVIATION 4 - 8AV92

Cost: \$79.00

AEROPLANE AT WAR

This topic describes the various ways in which the aeroplane has been employed as a weapon of war from its invention to the present day. Educational objectives covered:

- Fighters
- Bombers
- Transports
- Wartime patrol aircraft
- Helicopters

HUMAN FACTORS IN AVIATION

This topic examines the human element of aviation and how it integrates with the aircraft itself. It addresses many of the human factors which have led to aircraft accidents and incidents.

Educational objectives covered:

- Common causes of aviation accidents
- Accident analysis
- Crew management

Entry to the Aviation Course is only available to those students who have been selected by the testing and /or interview with aviation co-ordinator process.

FOR MORE INFORMATION CONTACT

Teacher in Charge:

Mr Randal Brink

randall.brink@education.wa.edu.au

Head of Learning Area:

Mr Kim Rosenthal

kim.rosenthal@education.wa.edu.au

For enrolment forms and to apply for testing dates please contact school administration on 6274 1300.

GRAPHIC DESIGN MEDIA

APPROVED SPECIALIST PROGRAM

Graphic Design Media students will cover a wide variety of contexts from different areas of design and media production during this year.

Year 9 (1GDM9)

Year Cost: \$130.00 plus booklist items

CORE (CLASS) CURRICULUM (4HRS PER WEEK IN CLASS)

Projects range from Interactive Games and Web Design, 3D Animation and Creature Development, Web Design, Print and Kinetic Graphics, Architecture, Fashion, Industrial Design and Film Production. Main projects will typically be term-based assignments which are split up into segments that develop different aspects of students' skills and knowledge.

CO-CURRICULUM

At the heart of the program are the professional master-class workshops. These enable our students to work (both in school and sometimes externally) with professionals in various design and media based industries. Delivered by industry professionals master-class workshops can include such topics as film special effects, maquette construction and 3D animation.

AFTER HOURS

In the same way that other specialist programs have out of school hours components to their courses it is expected that GDM students spend time out of class practicing skills and/or extending class work. It is suggested that 1 hour for every hour of class time be set aside as a nominal benchmark per week. This will include activities such as:

- Sketching and drawing from life
- Scrap booking and collecting
- Completing software tutorials (usually online)
- Creating photo journals
- Collecting reference materials and imagery for projects at school

ENTRY REQUIREMENTS / PRE-REQUISITES

As a certified Specialist Program, GDM recruits students state-wide. They are selected based on academic testing, creativity and portfolio interview. Students may exhibit a wide range of different types of projects in their portfolios, though the emphasis is on students who are able to work independently and who have demonstrated both sustained commitment and technical quality in their work.

***Please note** that very few students are selected to BEGIN Graphic Design Media in year 9 as the usual entry point is year 7. Special circumstances and transferees from other schools will be considered assuming places are still available and wait lists are exhausted.

SUPPORT

The GDM program at Melville SHS is supported by a dynamic parent support group who contribute to the richness of the program through direct assistance and fundraising activities.

FOR MORE INFORMATION CONTACT

Acting Teacher-in-Charge: Mr Sam Cavallaro
Head of Learning Area: Mr David Anderson

For enrolment forms and to apply for testing dates please contact the school on 6274 1300

MUSIC IN FOCUS PROGRAM

MSHS SPECIALIST PROGRAM

Year 9 (1MU9)

Year Cost: \$120.00 plus
ensemble & instrumental lesson costs

CORE (CLASS) CURRICULUM (4HRS PER WEEK IN CLASS)

Class curriculum covers topics such as: music from the 70's and 80's and today; theory composition; music in society; responding to and critiquing performances; and in-class band performance and rehearsal for all students.

CO-CURRICULUM

Instrumental Music School Services provide lessons free of charge at Melville Senior High School to students selected for the Music in Focus Program who are continuing lessons from year 8. Lessons are available on Classical Guitar, Electric Guitar, Bass Guitar, Percussion, Brass, Saxophone, Clarinet and Flute.

Please note that very few students are selected to begin IMSS instrumental lessons in year 9 as usual entry points are years 6 and 7. Students wishing to do so must meet with the Teacher in Charge of Music and get approval from IMSS. Special circumstances and transferees from similar high/primary school programs may be given opportunity to audition assuming that places are still available and wait lists are exhausted.

As a part of their classroom studies students will continue their lessons with IMSS's instrumental teachers. This part of the students' program provides opportunities for the extension and practical application of classroom learning.

It also is a condition of enrolment in the MiF program that all students join the Vocal Ensemble for 1 hour per week and are also required to join our Senior Concert Band, our Intermediate Concert Band or our Classical Guitar Ensemble which rehearse once a week before or after school to fulfil the ensemble requirement of the course.

EXTRA-CURRICULUM

MiF students are also given many exciting opportunities to enrich and extend learning through participation in camps, tours, workshops and a variety of public performance opportunities.

AFTER HOURS

It is expected that MiF students spend time out of class practicing skills and/or extending class work. In addition to regular instrumental practice it is suggested that students set aside one hour for every hour of class time as a nominal benchmark per week. This will include activities such as:

- Instrumental practice
- Ensemble repertoire
- Set works study/other homework

The following ensembles and bands have after-hours rehearsal commitments:

- Classical Guitar Ensemble (Years 7-12)
- Swing Band (invitation only)
- Intermediate Concert Band (Years 7-10)
- Senior Concert Band (Years 10-12)
- Junior Vocal Ensemble (Years 7)
- Melville VOX Vocal Ensemble (voice students)

ENTRY REQUIREMENTS/PRE-REQUISITES

Successful completion of the year 7 MiF Program or completion of the application process including an audition and interview with the Music Teacher-in-Charge for selected applicants.

SUPPORT

The MiF Program is underpinned by a dynamic parent support group who contribute to the richness of the program through direct assistance, participation in extra-curricular activities and fundraising activities.

FOR MORE INFORMATION CONTACT

Acting Teacher-in-Charge:	Ms Nikala Cunningham	nikala.cunningham@education.wa.edu.au
Head of Learning Area:	Mr David Anderson	david.anderson@education.wa.edu.au

For enrolment forms and to apply for testing dates please contact the school on 6274 1300

NETBALL

APPROVED SPECIALIST PROGRAM

Netball 3NE9

Cost: \$90.00 each semester

What are the qualities and elements of the program that make it special?

Melville Senior High School provides students with four lessons per week all year round. The majority of the sessions are on the court learning new skills, strategies and improving both **individual** and team skills. There are opportunities to cooperate in a team environment through the use of communication activities both on the court and in the classroom. The students are provided with opportunities to develop a deeper understanding of the game, explore the link between nutrition and performance and develop their umpiring and coaching abilities as part of the **theory** side of the program.

Levels are according to the outcomes in Physical Education: skills for physical activity, self-management skills, interpersonal skills and knowledge and understanding.

How does the program provide rigour and challenge, pursuit of excellence individual learning and problem solving ability to meet the needs and interests of my child?

The program is developed with input from Netball WA and is designed to add to the experience and skills that have been developed in the individual through their club participation and training. Students will follow individual programs and will be able to chart their improvement and progress as they go through the course. Students will become flexible in the positions in which they can play, and will also be provided with opportunities for development in positions in which they may specialise. Students will learn to manage, coach and umpire throughout the program, and will be expected to put their experience and knowledge into practice when participating with their club. There will be a practical experience component to the course where the students will be expected to demonstrate their management, coaching and umpiring abilities as part of their assessment.

What are the anticipated student outcomes and achievement at various levels, eg local, state and national levels of recognition?

Outcomes anticipated are as follows:

- Develop a Diamond Program (Year 7)
- Rules of the game (Year 7)

- Introduction to Umpiring (Year 8)
- Role modelling at primary schools (Year 8)

- Level 1 Umpiring (Year 9)
- Umpiring primary school tournaments (Year 9)

- Accredited Sports Medicine course (Year 10)
- Accredited Foundation Coaching course (Year 10)
- Phys. Ed. Studies introduction (Year 10)
- Ability to coach, manage and umpire teams (Year 10-12)

- Ability to organise all aspects of a netball carnival (Year 11/12)
- Stage 2 Phys. Ed. Studies - netball specific (Year 11/12)

FOR MORE INFORMATION CONTACT

Students who wish to join the specialist netball program in Year 9 should contact

Netball Teacher In Charge:

Ms Taryn Smith

taryn.smith2@education.wa.edu.au

ARTS

LEARNING AREA

The Arts provide opportunities for students to learn how to create, design, represent, communicate and share their imagined and conceptual ideas, emotions, observations and experiences, as they discover and interpret the world. They entertain, inform, challenge, and encourage responses, and enrich our knowledge of self, communities, world cultures and histories.

The Arts contribute to the development of confident and creative individuals, nurturing and challenging active and informed citizens. Learning in the Arts is based on cognitive, affective and sensory/kinaesthetic response to arts practices as students revisit increasingly complex content, skills and processes with developing confidence and sophistication through the years of schooling.

At Melville staff aim to provide students with authentic learning experiences that engage their minds, hearts, and bodies with learning experiences that are real and meaningful for them. While learning in other disciplines may often focus on development of a single skill or talent, the Arts regularly engage multiple skills and abilities. Engagement in the Arts - whether in Visual Arts or Performing Arts - nurtures the development of cognitive, social, and personal competencies

Arts Curriculum is divided into two distinct but related areas:

- Performing Arts (PA) - in which students learn in the Performing Arts or Music contexts
- Visual Arts (VA) - in which students learn in Media, Visual Arts or Design contexts

The table below reflects the multitude of Arts subjects on offer from all six of our contexts: Design, Visual Art, Media, Dance, Drama and Music. It represents the progression through various Arts courses into Senior School. Whilst an advantage, Senior School courses do not require previous experience in Middle School. However, a 'C' grade or higher in English is recommended for all classes.

In Year 9 students are free to undertake studies in Performing Arts and Visual Arts over the academic year. Selections should be based on personal interest and, importantly, aspiration for senior school courses.

Contexts	PERFORMING ARTS			VISUAL ARTS

Whilst an advantage, Senior School courses do not require previous experience in Middle School. However, a 'C' grade or higher in year 10 English is recommended for all classes.

PERFORMING ARTS (PA)

1PA9 - Performing Arts

Semester Cost \$20.00

Pre-Requisites: Nil

This multidisciplinary course allows students to develop their understanding of basic skills, techniques and processes of both Dance and Drama through movement, improvisation, choreography as well as scripted works. Course foci may include contemporary or hip-hop Dance styles and Dramatic contexts of Melodrama and/or Commedia Dell' Arte.

Students participate in practical workshops where they learn about various styles, movements and genres in a creative and safe environment. These lead into performances in class, at Variety Nights, Performing Arts festivals or in other parts of the school's performance program.

1MA9 - Music Appreciation

Semester Cost \$40.00

Pre-Requisites: Nil

This course hones student understanding of musical concepts and techniques and improves students' general musicianship. They will participate in activities that refine their understanding of musical elements, style and genre, music instruments and performance.

Students will also demonstrate practical skills and processes involved in performing, recording and producing music. They do this by composing and creating music using a wide variety of available technologies as well as traditional music instruments.

VISUAL ARTS (VA)

1ARP9 - Visual Art 1

Semester Cost: \$50.00

Pre-Requisites: Nil

In this course students generate ideas related to a given theme and art style as they select and apply elements, principles and artistic conventions to arrive at visual solutions. Their explorations are documented using a variety of media, materials and technologies, including painting, drawing and printing.

Critical analysis skills are developed by viewing and interpreting artworks and expressing considered personal responses that include considering how and why artists are influenced by other artists and the contexts of culture, time and place.

1ME9 - Media Arts

Semester Cost \$30.00

Pre-Requisites: Nil

This course consolidates student understanding of key Media concepts and skills. Students view, analyse and respond to examples of different media works and in doing so learn the language and terminology of Media.

In addition, students work independently and/or collaboratively to create their own complex media works that may include short videos, music videos, photographic works, advertisements, or animations. They also continue to develop their skills in using current media production technologies and industry standard production software.

1DES9 - Design (Graphics & Photography)

Semester Cost \$40.00

Pre-Requisites: Nil

This course develops students' understanding of the basic ideas, concepts and skills in the broad disciplines that are Graphics and Photography. Students view, deconstruct and respond to different examples of the two disciplines and in doing so learn essential language and terminology.

They also learn to communicate their ideas for an intended audience by creating work that may include CD and record covers, magazines, cartoons, illustrations, desktop publishing and posters. Students do this using a variety of printmaking and photographic techniques to develop their skills in design, illustration, photography, and industry standard software.

1ARC9 - Visual Art 2

Semester Cost \$50.00

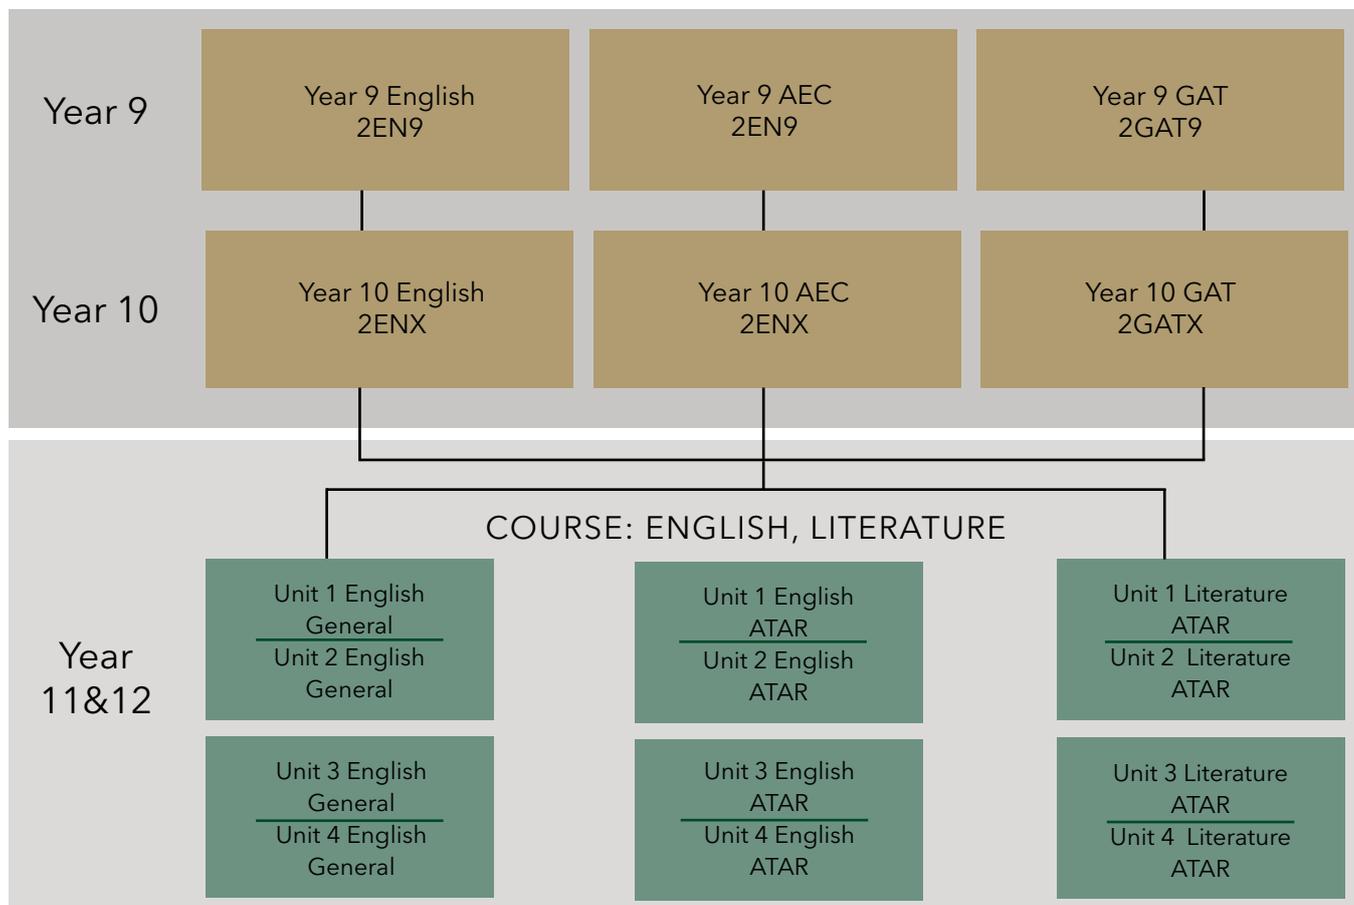

Pre-Requisites: Nil

In this course students explore three-dimensional media, materials, techniques and technologies, such as clay hand building skills as well as a variety of other sculptural media and techniques.

Critical analysis skills are developed by viewing artworks interpreting and expressing considered personal responses which include exploring how and why artists are influenced by other artists and the contexts of culture, time and place.

ENGLISH LEARNING AREA

ENGLISH 2EN9
ENGLISH 2GAT9 (Gifted and Talented)

Semester Cost: \$15.00
Semester Cost: \$30.00

This year students will be completing the Year 9 Australian Curriculum course for English. The national English curriculum is built around three interrelated strands that support students' growing understanding and use of English. These strands are:

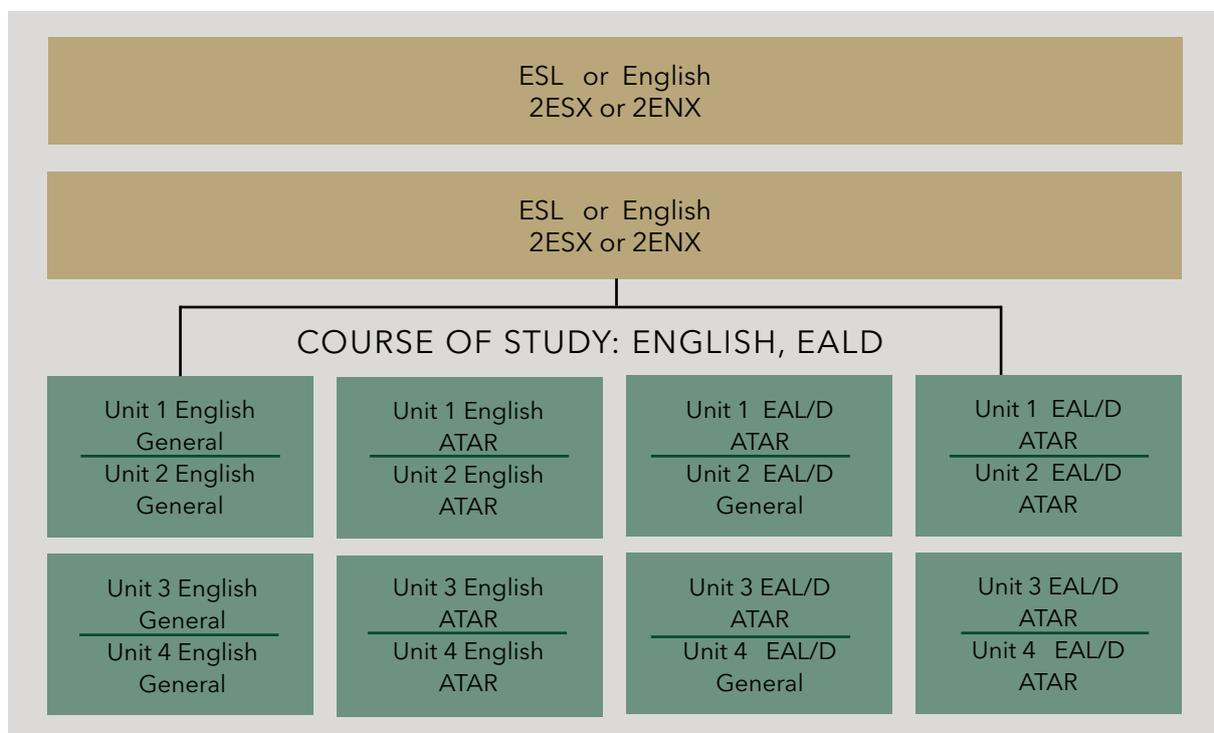

- Language
- Literacy
- Literature

The three strands are not designed to be curriculum modules or sub-programs: but rather should be seen as interwoven. They represent aspects of learning that together can be addressed in any activity or sequence of work. As part of their course work students will study a range of text types including novels, short stories, non-fiction and advertising. They will be expected to demonstrate mastery of a range of writing genres including narratives, expository and multi-modal texts. Students will develop their skills in essay writing and be expected to be able to use a range of rhetorical devices in persuasive essays. The new curriculum places extra emphasis on the development of an understanding of how the English language works. As a result there will be regular lessons developing skills in grammar and spelling.

A significant feature of the Year 9 course will be the NAPLAN testing conducted at the beginning of Term 2. These national tests in reading, writing, spelling and language conventions give parents, students and teachers the opportunity to measure student progress against national benchmarks. Although they are only one aspect of monitoring student progress, they are an important item on your child's school calendar. As a result, students will be taught to study and prepare for NAPLAN tests and encouraged to develop strategies for working in a limited time frame.

ENGLISH AS A SECOND LANGUAGE / DIALECT (EALD)

LEARNING AREA

ENGLISH AS A SECOND LANGUAGE - 2ESL9

Semester Cost: \$22.00

ESL English is a flexible program of instruction for language and literacy development, designed to assist students whose first language is not English. ESL classes are formed in Year 8, 9 and 10, as required. Newly arrived students are eligible for ESL studies during their first 3 years in Australia.

ESL education caters for those students who have recently arrived in Australia from a non-English speaking country or those who have recently exited from an Intensive English Centre (IEC). At each year level, students are encouraged to take advantage of ESL provision to improve and consolidate their English language and literacy skills. Being a competent user of English is essential for success at school.

ESL is not a modified mainstream English course but rather focuses on improving oral and written language skills across a range of English texts and subject area content. In particular, ESL studies are designed to help students with basic aspects of English such as:

- Pronunciation
- Spelling
- Vocabulary development
- Grammar
- Sentence construction
- Paragraph organisation
- Whole text construction

ESL classes are small and therefore, students are assisted individually to ensure improvement and develop confidence.

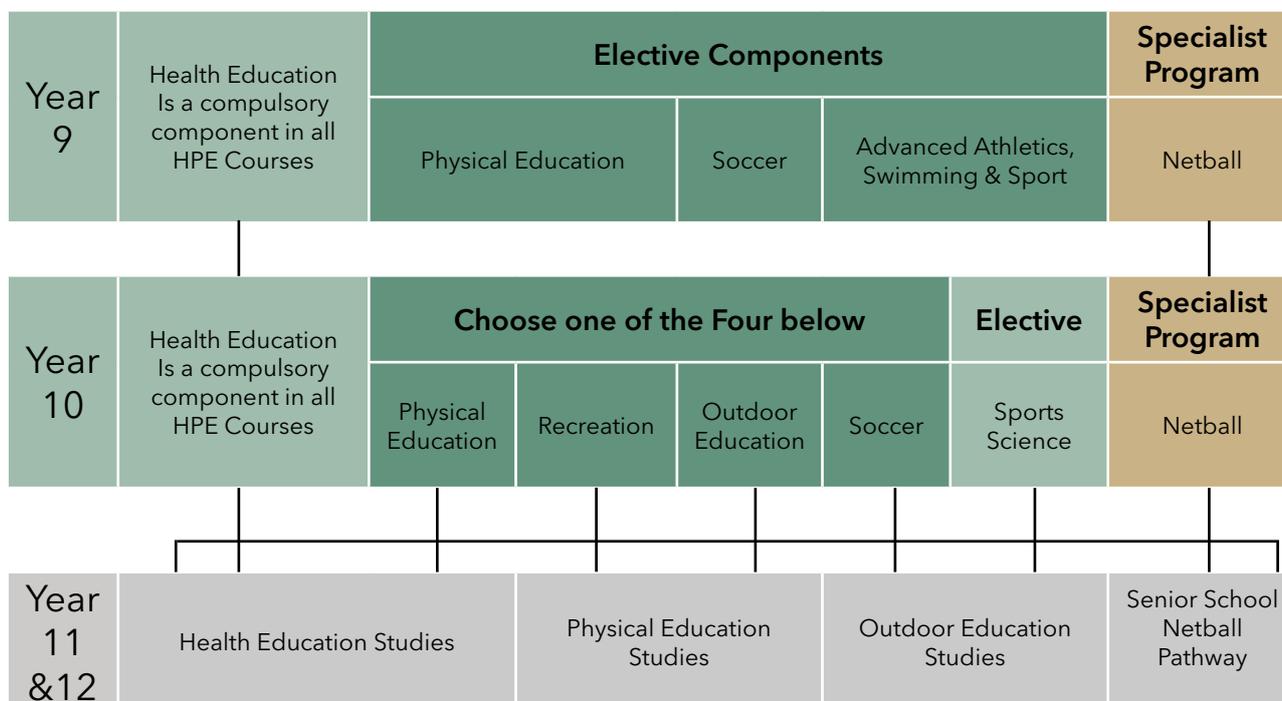

In Years 8 and 9, ESL teachers focus on improving students' Standard Australian English skills in preparation NAPLAN testing. Grades achieved by students are based on each student's progress against the ESL/ESD progress maps in the four language modes: speaking/listening, reading/viewing and writing. All lower school ESL programs are designed to effectively prepare students for achieving their WACE.

Finally, ESL classroom programs will assist learners to develop key cultural and social understandings by discussing, watching, reading and responding to a range of Australian fiction and non-fiction texts across a range of common school genres (e.g. persuasive and argumentative texts, documentary, report, journal writing etc).

HEALTH & PHYSICAL EDUCATION

LEARNING AREA

Health and Physical Education Learning Area outcomes are linked to the progressive development of a healthy, active lifestyle for students. Students' progress throughout their schooling to achieve higher levels of skills and knowledge about influences that enable the attainment of healthy active lifestyles. Students also utilise time in the Health and Physical Education Learning area to develop self-management skills, which are based on informed decision making. Central to the ongoing education of each student is the development of interpersonal skills for the establishment and maintenance of effective relationships in life. Outcomes linked with the Health and Physical Education Learning Area are predominantly addressed through learning in such areas as Health Education, Physical Education, Outdoor Education, Recreation, Sport and Dance.

HEALTH EDUCATION - 3HE9

Semester Cost: \$8.00

The focus during this course is on knowledge, communication, decision making and assertiveness. Pressures to be sexually active and strategies to counter these influences are considered. Ambitions and goals are clarified. Issues related to the use of alcohol, tobacco, and drugs (both legal and illegal) are comprehensively discussed. Lifestyle choices connected with conception, pregnancy and births, as well as contraception is reviewed. Individual diet and exercise programs are monitored and personal fitness levels are measured.

PHYSICAL EDUCATION - 3PE9

Semester Cost: \$11.00

Linked with the Health Education component will be physical activity electives that will allow students to develop outcomes in aspects of swimming, lifesaving, hockey, touch, football, athletics, netball, badminton and cricket. These sports will engage students in skill development and involve them in cooperative and strategic games. Team groupings should allow students to demonstrate the full potential of their skills and to practise and acquire higher levels of movement skills and strategies. Integrated within the activity sessions will be opportunities to develop interpersonal and self-management skills, as well as to encourage the establishment of positive attitudes and values toward living a healthy lifestyle.

SOCCER PROGRAM - 3SO9

Semester Cost: \$35.00

Students may elect to participate in a special soccer class. This class will be delivered by a specialist soccer coach. The program aims to develop personal and team skills through training and games and may involve

representing Melville SHS in competition. Skills and understandings will also be developed in coaching and umpiring, not just playing. Students need to have a background in soccer or a strong interest in learning the game in order to select this course. This program has a 'learning through game-play' focus.

ADVANCED ATHLETICS, SWIMMING & SPORT - 3AS9

Semester Cost \$25.00

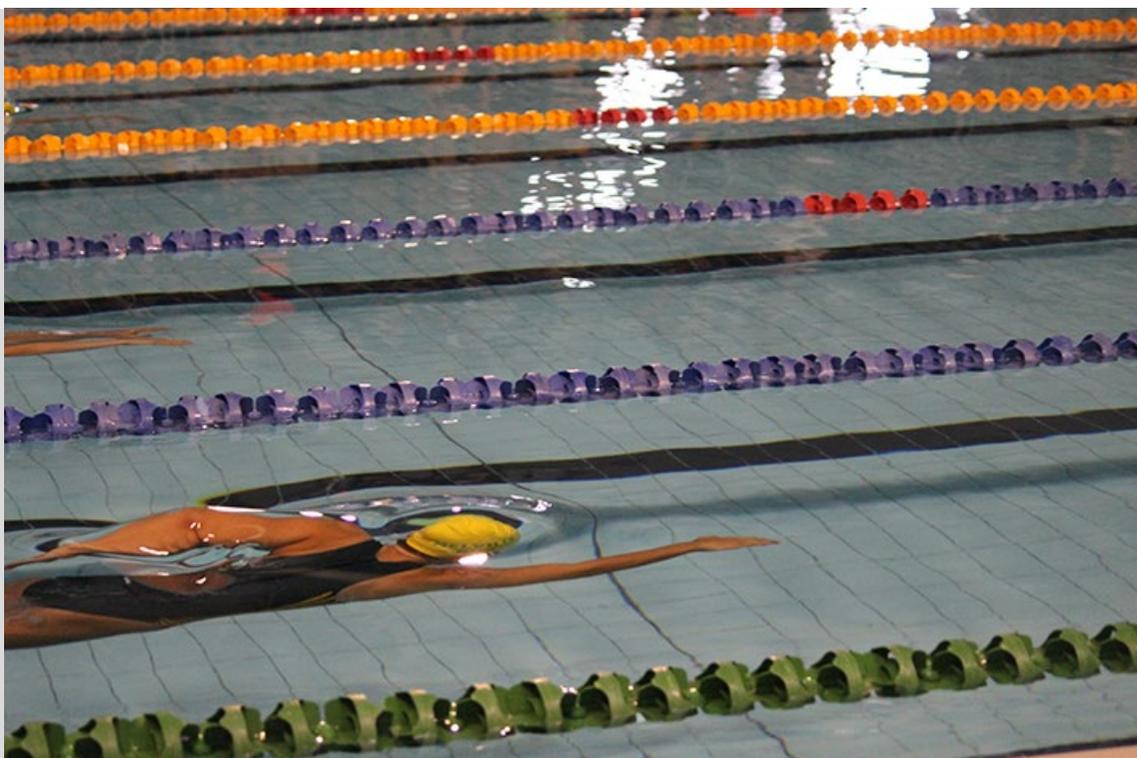

(Note: students who select this subject will also participate in a selection of sports from the mainstream Year 9 PE program to add variety in the experiences provided to them).

This is a continuation of the Year 7 & 8 Advanced Athletics, Swimming and Sport subject. Students may elect to participate in this subject instead of the mainstream Year 9 Physical Education subject. This subject is new to the handbook and is aimed at students who primarily have a strong interest in athletics and swimming and who are, or want to become members of our coveted A division Athletics team and Inter-school Swimming Team. Students who select this subject need to have a genuine interest in athletics and swimming and be interested in improving their ability and performance in this subject. A range of fun activities and skill development activities have been designed to maximise individual performance in Inter-school events and include:

Event specific training and skill development in Athletics & Swimming

- Mini-triathlon & mini Bi-Athlon
- Run, swim, board paddle activities (using the school pool)
- Cycling & group fitness (such as circuits) and fitness classes (such as yoga)
- Personal fitness programming and conditioning
- Aquatic aerobics, fun pool based activities & selected sports from the Year 8 PE program.

(Note: If an insufficient number of students select this subject, students will participate in the normal Year 9 mainstream PE program).

HUMANITIES & SOCIAL SCIENCES

LEARNING AREA

Year 9	Semester 1 & 2 - four hours per week						
Year 10	Semester 1 & 2 - four hours per week						
Year 11&12	Accounting & Finance	Economics	Geography	Modern History	Politics & Law	Career & Enterprise including Workplace Learning	BSB20115 - Certificate II in Business* * RTO VETiS Consulting RTO code 52499

HUMANITIES AND SOCIAL SCIENCES

Semester Cost: \$17.00

The Year 9 course has an emphasis on Australia and their role in a globalised world. Students will achieve outcomes in the contexts of Geography, Civics and Citizenship, Economics and Business and History.

In Geography Year 9 students will investigate the concept of food security and they will discuss issues such as who has access to food in the world and who does not, as well as the reasons why. They will then study the concept of "Interconnections". This is how people are connected around the world, through transport, communication and travel.

In History students learn about the Industrial Revolution and how this part of history still has an impact on the world today. They discover that concepts such as workplace rights and relations were developed in this time and have changed over time to create the workplace rights that are taken for granted today. Students then learn about World War I and Australia's role in the "war to end all wars". They will learn about the ANZAC legend and how this legend has changed and developed Australia's identity, and the impact this has on Australia today.

In Civics and Citizenship students research the role of political parties in the Australian political system. They discover how citizen's ideas and choices at election time are influenced by advertising and political parties. They then learn how the Australian court system upholds the laws of Australia. We look at the hierarchy of the court system and how each tier interprets laws.

In Economics and Business students ascertain the role of the consumer in society. They determine how their choices as consumers impact on their local economies and on the economy of Australia.

The Humanities and Social Sciences outcomes covered in Years 9 will lead to entry into the following Senior School courses of study:

- Geography
- Economics
- BSB20115 - Certificate II in Business (RTO VETiS Consulting Services Pty Ltd RTO Code 52499)
- Modern History
- Career and Enterprise
- Politics and Law
- Accounting and Finance

Entry into Humanities and Social Sciences courses in Senior School years will be influenced and affected by grades attained in lower school.

It is recommended that students be achieving a 'B' Grade in Humanities and Social Sciences for entry into these courses, although students who are aiming for university entrance should be achieving 'B' Grade by the end of Year 10.

LANGUAGES

LEARNING AREA

	ITALIAN	CHINESE		
Year 9	Italian Year Length Course 4IT9	Chinese Second Language Year Length Course	Chinese Background Language Year Length Course	Chinese First Language Year Length Course

LANGUAGES

Multiple languages for our multicultural society

There are two languages offered to students at Melville Senior High School: Italian and Chinese. The rise and interest in Languages and the need for Languages in a global context, has seen the need for the Western Australian Curriculum to mandate that Languages must be learnt at some stage in a student's educational journey. Today, knowing a Language sets you apart from everyone else and gives you that edge in employment opportunities, travel experiences and general communication. Languages empowers!

Students are encouraged to continue with the language they studied in the previous year to maximise competency and learning opportunities into the post-compulsory years of schooling and tertiary education. The course will run for an entire year.

Learning a language is the best way to learn about cultures and societies other than our own and to help us see the world from another perspective. It also makes us go back to language basics, helping us to strengthen our understanding and literacy skills in our first language as well as making us more adaptable to our social and working environments.

Languages also make us think about the way we learn and memorise facts and information, which we can apply to any other learning area. Learning a language also provides excellent opportunities for those intending to pursue a career in the defence forces, hospitality, tourism, fashion, as a translator, Editor or Proofreader, Interpreter, Teacher, Language Engineer, Lexicographer, Linguist, Localizer, Program Manager, Subtitler, Voice over, Terminologist, Transcriptionist, Translator, News reader and Broadcaster, tourism and hospitality fields or in any field that requires the application of people skills and language.

ITALIAN - 4IT9

Semester Cost: \$10.00

Italian is the language of romance, Europe and finesse. It is encouraged for students who have learnt Italian in primary school and Year 8.

Travel, communicating and enjoying the best bits of Italian culture.

The program focus for Semester 1 is 'Buon Viaggio'. This program will develop students' language skills

to a level where they can communicate while travelling through Italy. Students will be recognising Italian monuments and cities and looking at modes of transport through Italy including travelling on the Eurostar. Students will be participating in role plays and classroom games to strengthen conversation skills in Italian. Students will compare the climate between Australia and Italy, as well as discuss clothing and other items you would need to travel overseas.

The program focus for Semester 2 is 'In Citta con gli Amici'. This program will examine leisure activities of teenagers in Italy and compare them to our own leisure activities here in Australia. Students will be using vocabulary related to places they would like to go to in the city (including different types of shops) and be able to give directions, read, draw and label maps. Cultural aspects such as understanding road rules and signs in Italy are also studied. Italy and Italians are lovers of coffee. 'Bars' are scattered throughout Italy where people can get food, coffee and alcohol. Students will be able to understand an Italian bar menu, ask for drinks and snacks and express likes and dislikes of foods. They will also gain an understanding of the Italian currency, the Euro and the Italian migration. Students will further explore relationships, social issues and discussing the future.

CHINESE - 4CS9, 4CB9 or 4CFL9

Semester Cost: \$10.00

Chinese Second Language (CSL) is for students with no or limited Chinese literacy. Year 8, 9, 10 (Unit 1A)

Unit 1A CSL

The focus is Daily routine, sports & leisure. It introduces students to the Chinese language and culture from a personal perspective, enabling them to share information related to personal identity, aspects of everyday life, and popular culture. They begin to develop an understanding of what it is to be Chinese-speaking, and compare their own lives to those of others in Chinese-speaking communities.

Unit 1B CSL

The focus is Shopping and eating out in China. It is aimed at students who have basic knowledge of Chinese. They share information about and develop a sense of their own space and place. While developing the skills to travel within Chinese-speaking communities, students learn more about communities and their cultures and their sense of space and place.

Chinese Background Language (CBL) Year 8, 9, 10

Chinese Background Language Course is designed for students who have received a few years of formal education in a Chinese speaking country or area. Chinese Background Speakers Course is one of the tertiary entrance examination subjects in Western Australia.

Stage 1 A covers the theme of the Individual & the Community and Youth Culture. Students will explore the following issues in their native language, Chinese.

- The role of the individual in today's society
- Changing gender roles in today's society
- The role of family and marriage in contemporary society
- Pressures on young people today
- The place of education in young people's lives
- The impact on young people of changes in traditional social values.

Students are given opportunities to develop skills in analysing Chinese literature and writing a variety of articles in Chinese.

Stage 1 B covers the themes of Chinese Communities Overseas and Global Issues.

Students will explore the following issues in their native language, Chinese.

- Adapting to new cultures (education, leisure, lifestyle)
- The maintenance of Chinese cultural contexts
- Economic growth and its impact
- Environmental issues
- The impact of international influences on Chinese-speaking countries

Students are given opportunities to develop skills in analysing Chinese literature and writing a variety of articles in Chinese.

MATHEMATICS

LEARNING AREA

Year 9	Semester 1 and 2 - 4 hours work per week	
Year 10	Semesters 1 and 2: 4 hours work per week	Students will undertake a senior school course as determined by the GAT teacher
Year 11&12	<p>There will be three ATAR courses of study</p> <ol style="list-style-type: none"> 1. Mathematics Applications 2. Mathematics Methods 3. Mathematics Specialist <p>High achieving students may be given the opportunity to study two of these courses (Methods and Specialist).</p> <p>There will be one non-ATAR (general) course</p> <ol style="list-style-type: none"> 1. Mathematics Essential 	

MATHEMATICS - 5MA9

Semester Cost: \$12.00

MATHEMATICS- 5GAT9 (Gifted & Talented)

Semester Cost: \$17.00

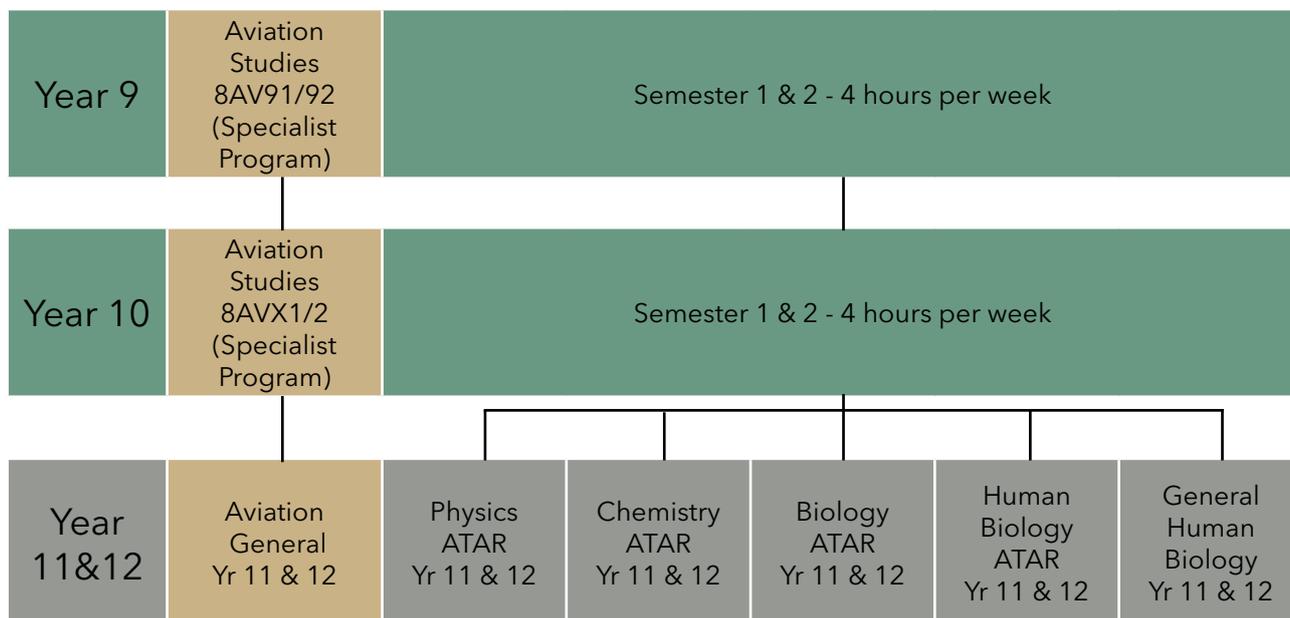

All Year 9 students will study Mathematics for four hours per week. In Year 9, students further their studies in Number and Algebra, Measurement and Geometry and Statistics and Probability. Students working at the higher levels will have greater emphasis placed on the area of Algebra and Problem solving.

Changes will be made to classes during the year based on performance in an attempt to keep students of similar ability in the same group. This process will continue into and through Year 10 during which time students will be advised of their entry point into the post compulsory courses of study in Mathematics.

SCIENCE

LEARNING AREA

SCIENCE - 6SC9

Semester Cost \$17.00

In Year 9 all students will study the following outcomes:

Term 1	Earth Science and Chemistry
Term 2	Chemistry and Physics
Term 3	Physics and Biology
Term 4	Human Biology and Biology

These outcomes are interwoven with the process outcomes of Science Inquiry Skills. All Year 9 Science classes complete the same curriculum and common assessments.

Students planning to attempt ATAR science courses in Year 11 and 12 need to achieve a 'B' grade in second semester Year 9 Science course. This will ensure they will be placed into the higher pathway science classes in Year 10 that are essential for the upper school courses.

TECHNOLOGIES

LEARNING AREA

In an increasingly technological and complex world, it is important to develop knowledge and skills to analyse and creatively respond to design and/or digital challenges.

Society needs enterprising students who can make discerning decisions about the development and use of technologies, develop solutions to complex challenges and contribute to sustainable patterns of living. Technologies can play an important role in transforming, restoring and sustaining societies and natural, managed and constructed environments.

The Technologies curriculum is STEM focussed and is divided into two distinct but related contexts:

- Design and Technologies (DAT) - in which students learn in the contexts of Woodwork, Mixed Materials, Food & Nutrition, and Textiles
- Digital Technologies (DT) - in which students learn in the contexts of Digital Engineering and Digital Technologies

This document presents the Technologies courses on offer at Melville Senior High School. The table below represents the progression through various Technologies courses into Senior School. Whilst an advantage, Senior School courses do not require previous experience in Middle School. However, a 'C' grade or higher in year 10 English is recommended for all classes.

In Year 9 students are free to undertake studies in Design & Technologies and Digital Technologies over the academic year. Selections should be based on personal interest and, importantly, aspiration for senior school courses.

Contexts	DESIGN & TECHNOLOGIES (DAT)				DIGITAL TECHNOLOGIES (DT)	
	OPEN COURSES				OPEN COURSES	
YEAR 9 Semester Courses	Woodwork (MDT) 8MDW9	Materials (MDT) 8MDM9	Foods (MDT) 8MDF9	Textiles (MDT) 8MDT9	Digital Engineering 8DE9	Digital Technologies 8DT9
YEAR 10 Year long Courses	Woodwork (MDT) 8MDWX	Materials (MDT) 8MDMX	Foods (MDT) 8MDFX	Textiles (MDT) 8MDTX	Digital Engineering 8DEX	Digital Technologies 8DTX
Senior School Courses of study	<ul style="list-style-type: none"> • General Building & Construction (GBCN/GTBCN) • General Children, Family & Community (GECFC/GTCFC) • General Design - Technical Graphics (GEDEST/GTDEST) • General Food Science & Technology (GEFST/GTFST) • General Materials Design & Technologies - Woods (GEMDTW/GTMDTW) • Certificate II in Engineering Pathways (ENGV2, 11/12) 				<ul style="list-style-type: none"> • ATAR Applied Information & Technology (AEAIT/ATAIT) • General Applied Information & Technology (GEAIT/GTAIT) 	

Whilst an advantage, Senior School courses do not require previous experience in Middle School. However, a 'C' grade or higher in year 10 English is recommended for all classes.

DESIGN & TECHNOLOGIES (DAT)

8MDW9 - Woodwork

Semester Cost \$45.00

Pre-requisites: Nil

In Woodwork students explore a range of timbers, manufactured boards, joining techniques and design methods. Using supplied frameworks and available facilities and resources they design and create solutions to design challenges.

Students will make a range of projects using a range of tools, equipment and CAM laser cutting technologies to develop solutions to design challenges. This course is designed for students who enjoy a hands-on creative challenge that expands their knowledge of sustainable materials and practices used in society.

8MDM9 - Mixed Materials & Technologies

Semester Cost \$45.00

Pre-requisites: Nil

In Mixed Materials students refine their understanding of a range of materials including; plastics, metals and manufactured boards. They design and create solutions to design challenges using available facilities and resources. CAD software may also be used in the development of their design ideas.

Students make a range of projects by safely using workshop and power tools as well as CAM manufacturing. This course is designed for students who enjoy a hands-on creative challenge that expands their knowledge of materials used in society

8MDF9 - Food & Nutrition

Semester Cost \$60.00

Pre-requisites: Nil

In this course, students will complete a range of hands-on food production activities and activities that include the study of current food trends and foods from other countries. Packaged foods, fast foods and commercially prepared products will be studied, and students will be equipped with the knowledge and skills to enable them to make healthy and sustainable food choices.

Students are also given more complex recipes and food design challenges that allow them to effectively demonstrate their skills in the kitchen.

8MDT9 - Textiles

Semester Cost \$60.00

Pre-requisites: Nil

In this course, students learn about current fashion trends and sustainability and use a range of design techniques to create textile items that both look and feel good. They learn how to use a sewing machine as they apply their creative skills, individually and collaboratively, to create different textile items.

Please note if students wish to vary or extend their projects they may need to provide/pay for the extra materials.

DIGITAL TECHNOLOGIES (DT)

8DE9 - Digital Engineering

Semester Cost \$25.00

Pre-requisites: Nil

In this course, using industry software, students explore the world of digital engineering through computer assisted research, data analysis, design, drawing and manufacturing to design and develop practical engineering solutions.

Their understanding of the digital engineering process develops through structural and sustainable design, collaborative problem-solving and creation of physical engineering solutions.

In addition, students will have the opportunity to see some of their work produced using modern computer-controlled production processes, such as 3D printing and laser cutting.

This course provides sound preparation for students who aspire to study related courses in years 11 and 12, or to develop skills for Engineering and Design careers.

8DT9 - Digital Technologies

Semester Cost \$25.00

Pre-requisites: Nil

In this course students develop their understanding of computer networks in an interconnected world. They also learn how data is collected and used through simple day-to-day computer and device use. In addition, they study the theories behind designing digital solutions for users in app and game design.

Through practical application students learn by designing complex, relevant user experiences through testing, modifying and implementing digital solutions. They also learn to use appropriate protocols when communicating and collaborating online.

This course provides sound preparation for students who aspire to study related courses in years 11 and 12, or to develop skills for Computing or Multimedia careers.
